OUR QUALITY AND FOOD SAFETY POLICY

In our company operating in the food industry, we produce products with the necessary systems for product safety, authenticity, quality and compliance with national and international legislation and meet the demands of our business partners every time and on time.

In accordance with the developing and updated quality and food safety standards, taking precautions by evaluating all internal and external risks, working in line with the quality and food safety system, in the processes from the preparation of our products to consumption;

1-To prevent and manage food safety hazards in terms of microbiological, physical, chemical, fraud, sabotage and allergen risks, to ensure effective and dynamic control and continuity of hazards.

2-Taking measures to protect product authenticity by producing original products that do not contain imitation or adulteration,

3-Continuously improve the quality management system and the processes we achieve in line with the quality management system,

4-Meeting customer demands and expectations on time and every time in line with standards and national-international laws,

5-To create a trained, conscious, solution-oriented and responsible staff with a management approach that prioritizes employee satisfaction,

6-Continuously develop and improve food safety and quality culture with all our staff,

7-To determine and develop targets to prevent food losses and waste, our unchangeable policy.

The policy has been clearly communicated to all concerned parties.
